

Macalister Demonstration Farm, Dairy Australia, Extension Project

Projects on the farm are funded by Dairy Australia, the Gardiner Foundation, Sustainability Victoria, DPI VIC, Department of Agriculture Food and Fisheries, with support provided by GippsDairy.

Macalister Demonstration Farm Update 318 (Week ending Oct 5, 2012)

The Macalister Demonstration Farm is now milking 251 cows grazing 67 hectares, a stocking rate of 3.7 cows per hectare. The daily allocation is one 42nd of the grazing area and the actual grazing rest time 48 days.

Compared to the previous week, milk production per cow is up from 2.18 to 2.25 kg milk solids (MS) per cow per day. Litres per cow per day are up from 30.2 to 31.0. Milk fat test has risen from 3.87% to 3.93% (fat yield is up from 1.17 to 1.22 kg per cow per day). Milk protein test has fallen from 3.36% to 3.32% (protein yield has risen from 1.01 to 1.03 kg per cow per day). This time last year, milk production was 28.5 litres, 2.13 kg MS, 1.17 kg fat, and 0.96 kg protein per cow per day.

The daily pasture consumption from the grazing area is up from 50 to 55 kg dry matter (DM) per hectare per day. The pasture consumption per cow is up from 13.5 to 14.8 kg DM per cow per day. This time last year, pasture consumption was 49 kg DM per hectare per day, and 12.4 kg DM per cow per day.

1.6 mm of irrigation water, 0.8 kg of nitrogen element, 0.05 kg phosphorus element, 0.19 kg of potassium element, and \$0.19 of pasture renovation, all per hectare per day, have contributed to the current pasture consumption. The daily spend on these pasture inputs totals \$2.95 per hectare per day. Based on those cash inputs only, the consumed pasture price is estimated to be \$53 per tonne of dry matter, up from \$52 last week.

Supplementary feed includes crushed wheat, and a pellet containing 25% protein, minerals, Rumensin, and Eskalin, totalling 3.6 kg DM, at an average price of \$420 per DM tonne.

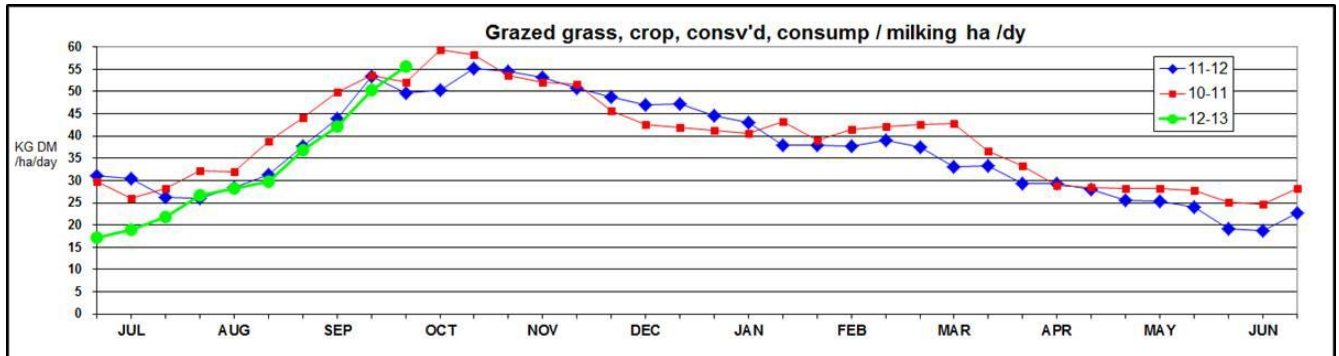

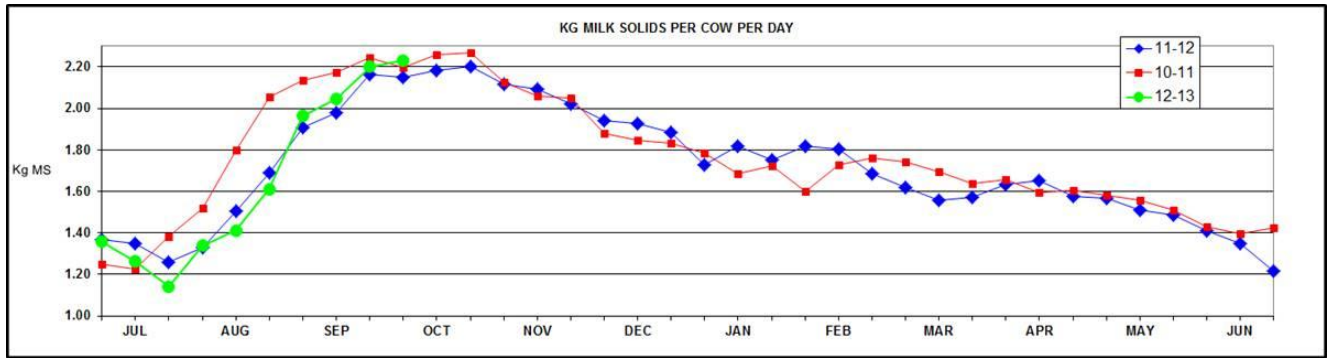

The Bulk Milk Cell Count for the week was 107,000. This time last year the BMCC was 91,000. The BMCC average for period ending 30/09/2012 was 114,000, giving the farm a factory ranking of 36th out of 384 farms.

The milk price (less compulsory levies) the MDF anticipates receiving for the week's milk is \$4.13 per kg milk solids, or 30.0 cents per litre.

Milk income per cow per day is up from \$9.07 to \$9.31, made up of \$3.25 for the fat, \$6.87 for the protein, and minus \$0.81 for the litres. This time last year milk income per cow per day was \$9.92.

Feed cost per cow per day (including pasture and supplements) is down from \$2.57 to \$2.28 per cow per day, leaving a Margin over All Feed (MOAF) per cow of \$7.03, up from \$6.50. The margin over all feed per hectare is \$26.31. The whole farm feed margin is \$1,758, up from \$1,538 per day. This time last year the whole farm feed margin was \$2,057 per day.
