

## **Macalister Demonstration Farm, Dairy Australia, Extension Project**

**Projects on the farm are funded by Dairy Australia, the Gardiner Foundation, Sustainability Victoria, DPI VIC, Department of Agriculture Food and Fisheries, with support provided by GippsDairy.**

### **Macalister Demonstration Farm Update 347 (Week ending May 3, 2013)**

The Macalister Demonstration Farm is milking 275 cows grazing 73 hectares, a stocking rate of 3.8 cows per hectare. The daily allocation is one 40th of the grazing area and the actual grazing rest time is 35 days.

Compared to the previous week, milk production per cow is down from 1.42 to 1.41 kg milk solids (MS) per cow per day. Litres per cow per day are down from 17.1 to 16.6. Milk fat test has risen from 4.39% to 4.55% (fat yield is up from 0.75 to 0.76 kg per cow per day). Milk protein test is down from 3.91% to 3.90% (protein yield is down from 0.67 to 0.65 kg per cow per day). This time last year, milk production was 19.2 litres, 1.58 kg MS, 0.84 kg fat, and 0.73 kg protein per cow per day.

The daily pasture consumption from the grazing area is the same at 29 kg dry matter (DM) per hectare per day. The pasture consumption per cow is the same at 7.6 kg DM per cow per day. This time last year, pasture consumption was 27 kg DM per hectare per day, and 7.3 kg DM per cow per day.

3.0 mm of irrigation water, 0.6 kg of nitrogen element, and \$0.19 of pasture renovation, all per hectare per day, have contributed to the current pasture consumption. The daily spend on these pasture inputs totals \$3.15 per hectare per day. Based on those cash inputs only, the consumed pasture price is estimated to be \$111 per tonne of dry matter.

Supplementary feed includes 5.3 kg DM per cow of a complete pellet containing minerals and Rumensin, at a price of \$422 per DM tonne, and 1.8 kg DM of PKE at a price of \$339 per DM tonne.

The Bulk Milk Cell Count for the week was 143,000. This time last year the BMCC was 195,000.

The milk price (less compulsory levies) the MDF anticipates receiving for the week's milk is \$5.84 per kg milk solids, or 49.3 cents per litre. This time last year it was \$6.31 and 51.8 cents.

Milk income per cow per day is down from \$8.30 to \$8.20, made up of \$2.75 for the fat (up from \$2.71), \$5.88 for the protein (down from \$6.04), and minus \$0.43 for the litres. This time last year milk income per cow per day was \$9.94.

Feed cost per cow per day (including pasture and supplements) are down from \$3.71 to \$3.70 per cow per day, leaving a Margin over All Feed (MOAF) per cow of \$4.49, down from \$4.58. This time last year the feed margin per cow was \$6.28. The margin over all feed per hectare is \$16.92 (last year \$23.17). The whole farm feed margin is \$1,235, down from \$1,264 per day. This time last year the whole farm feed margin was \$1,672 per day.
